

NEW YORK

ROUND 1

An 8-inch high, 500-year old Chinese vase worth \$20 million was stolen from the New York City Museum of Fine Art, a few minutes before they closed at 11:00 pm.

There are 4 suspects:

Lord Attenborough

Lady Sinclair

Sheik Ranadan

Mrs. Lacy

The Chief Inspector on the case is under pressure to arrest a suspect as soon as possible. They are considering 4 factors:

1. Fingerprints
2. Motive
3. Presence at the scene
4. Video Surveillance Camera (VSC) evidence

Your responsibility has been to gather information, or evidence, around these four suspects, and relative to these four factors.

You have now come together to determine who they should arrest, if anyone. In 10 minutes, the Chief Inspector will no longer be able to hold anyone on suspicion, and if one is guilty that person will undoubtedly flee the country... time is precious for pooling your information!
